The Power of Collaboration
Analytic Solutions Network (ASN)

- Home to the secure ASN Network supporting the Trauma Cloud™ and Vendor Aggregator™.
- Wholly owned subsidiary of DI and backed by the expertise and experience of all the leading trauma registry vendors.
- The ASN network is completely grounded in creating vendor neutral solutions that work with all registry products.
- Supports registry interoperability for the trauma industry to help ***technically*** support regional, system, state and national compliance initiatives in the most cost effective and timely manner.

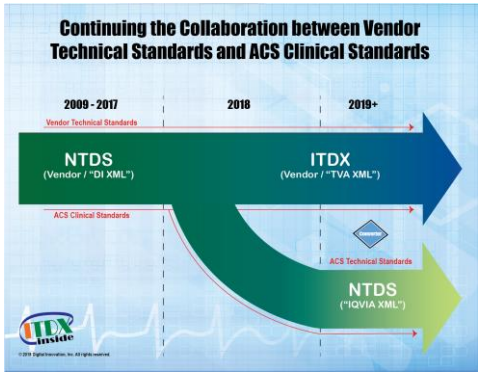
Background



- 2019 Not Business as Usual
- 1st Quarter 2019 call for data is upon us
- New technical format introduced and required by ACS
    - Format File
    - Validator
- Technical changes are not drop-in compatible with software
- Vendors have been planning for this significant change since 2017
- **Maintaining** vendor format (ITDX) is critical and **Centralization** essential
- Centralization achieved via use of the “ASN Compliance Hub / Vendor Aggregator™”

Current Status

- Daily Validation
- Quarterly Call for Data

Current Status

FEATURES	ASN COMPLIANCE HUB*
Support ITDX File Format (Vendor Format) • Local registry capable of producing ITDX file	✓
Centralized Converter • Translates ITDX file into NTDS file format	✓
Centralized Vendor Validator • Contains ACS NTDB/TQIP Validation Channels	✓
Daily Validation Tools & Capability • Phase I Registry Integration – Off Line Validation Patch • Interactive validation reports & dashboards via Driller® • File level report via Submission Processing Manager	✓
Centralized Submission Builder • On demand capability to build final NTDS file for submission to ACS	✓
Record Exclusion Functionality • Mechanism to exclude records from NTDS file if needed	✓

All features available for "no cost" and "low cost subscription" service options.

Current Status

- Trauma Cloud™ live since April 2017
  - 1,103 facilities are registered for the Trauma Cloud™

- Vendor Aggregator™ live since July 2018
  - 353 (growing daily) facilities are registered for the Vendor Aggregator™

Next Phases

- Maintain focus on centralization & expanding vendor tools to work with registry products
- In-Record Real-Time Validation
  - *Essential for daily registry productivity*
- Enhanced Driller® Reports
  - Benchmarking
  - Risk Adjusted Modeling
  - CD15-5 Compliance

New Developments

- American College of Surgeons announced intent to accept ITDX Files on April 30, 2019
  - Positive development and a good long term direction
  - Tangible example of innovation and achievement by the registry vendors
    (Gaining acceptance for ITDX everywhere)
  - Important consideration: quarterly data submission versus daily validation
  - Provides additional time to secure vendor solution

Summary

- Vendor-Neutral Solutions
  - Ability to work with all trauma registry products
  - Linkage capability for enhanced vendor tools that positively impact registry workflow, operations & productivity (ex., In-record validation)
- Improved Service and Efficiency for our Clients
  - Updates minimized to one location instead of every hospital
  - Economy of Scale
  - Quicker Turnaround Times
- Eye on the Future
  - Support all ACS initiatives including enhanced validation for NTDB/TQIP and CD15-5 Compliance
  - Enhance real-time integration and access to data
  - Provide additional benchmarking opportunities

Closing

ASN presents an amazing opportunity for the trauma industry and we could not be more excited about the successes we have already realized in support of national compliance and for what the future holds.

Centralizing core functionality and ensuring trauma registry compatibility and linkage through our unique collaborative vendor approach has paved the way for us to continue to grow and support all of you in a much more effective and efficient way.
